

DATEC

DIN-rail support for flush modules

Mount a compatible DATEC flush module on a DIN rail with this mechanical support. Suitable for the four-channel switch actuator and the eight-channel binary-input module.

1633.02000/00

One mounting accessory for both DATEC modules

Switch actuator compatibility

For DATEC 1630.03160/61100: four relay outputs, eight inputs and four LED outputs.

DIN-rail installation

Adapts the compatible flush module for installation on a DIN rail.

Manufacturer reference

DATEC 1633.02000/00.

Binary input compatibility

For DATEC 1630.03160/62100: eight contact inputs and eight status LED outputs.

Mechanical mounting accessory

The support holds the module. Electrical connections remain on the fitted device.

Shop KNX reference

Listed in the shop as 1633.0200000.

Installation

Use the support with the listed DATEC modules. Check that the rail, support and module are securely retained before connecting or energising the installation.

Rail shown for mounting illustration.

Connected module requirements

Follow the fitted module's documentation for wiring, electrical ratings, enclosure protection and operating conditions. Allow space for terminals and cable routing. The support does not replace an enclosure.
