

HYPERVISU TOUCH · DATASHEET

The Soul of Your Smart Building

Premium touch displays — where intuitive control meets architectural elegance.

10" wall display · 4" wall-box panel

PRODUCT OVERVIEW

The HyperVisu Touch Series is a family of premium Visualization displays designed to be the interface of high-end buildings. Combining ultra-slim industrial design with intelligent proximity sensing, it offers two formats: the 10" Masterpiece for halls and living spaces, and the 4" Essential that replaces cluttered switch banks in hotel rooms and offices. Both work exclusively with the HyperVisu Server to deliver responsive control of lighting, blinds, HVAC and scenarios.

KEY FEATURES

Premium Frame Architectural-grade finish for flawless integration in any interior.	Proximity Wake Displays activate automatically as users approach.	Ultra-Slim 11 mm Metal Frame The 10" model's thin profile sits elegantly against any wall surface.
High-Definition Display 1280×800 px on the 10" · 480×480 px on the 4" — crisp visuals at every size.	Voice & Audio Ready Built-in microphone arrays and speakers for intercom, voice and feedback.	Multi-Region Wall-Box Panels fits EU, UK and UAE standard wall boxes for global installs.
HyperVisu Native Exclusive pairing with HyperVisu Server for instant, responsive visualization.	Energy-Smart Sleep Auto-sleep mode conserves power and extends display lifespan over time.	Power over Ethernet Single-cable PoE supply for clean wall installations — no separate power needed.
